

Network Questionnaire

With all of the changes coming with Distance Learning in the next few years we want to make sure that your network is up to speed.

We would ask that one person from each school district fill out the following form and *return it to John Stritt or Brett Haffener by the April 15 LAN Managers meeting.*

Network Hardware

1. What are you using as your current router or edge device?
2. What are you using as your current firewall?
3. What types (makes and models) of switches do you have in your LAN? Are they managed or unmanaged? Are they 10Mbps, 10/100Mbps, or Gigabit switches?
4. How many codecs do you currently have in use or plan to have in use within the next couple of years?

Network Configuration

1. Are you currently using NAT?
2. Do you have a DMZ in place?
3. Are you using Multiple VLANs?

Students and Computers

1. How many students do you have in your school district?
2. What is your computer to student ratio?
3. Are you currently a 1-to-1 school? Do you plan to move to 1-to-1 in the near future?

Bandwidth Usage

1. What is your peak bandwidth usage on a normal day?
2. What concerns, if any, do you have with bandwidth and Internet access speed?

Training

*** Circle any that apply. ***

1. Please rate your LAN Management knowledge on a scale of 1 to 4. **1** **2** **3** **4**
2. Have you attended any of the following: **TALM** **Cisco Academy** **Network Training Course** **Other**
3. Would you be interested in any of the following: **TALM** **Network Training Course** **Microsoft**
