Name	Description
Connecting Alphabet Blocks	These colorful plastic blocks have connecting circles, similar to Legos, to help youngsters stack them. Both upper and lower case numbers are represented on the blocks.
Connecting Numeral Blocks	This set of plastic blocks includes both the numeral and mathematic symbols needed to complete computations. The blocks are built like Legos with connecting circles to help align and stack them.
Dinosaur Magnets	Use this metal box of magnets as a reinforcer for tasks completed or in your play area.
Double Inset Puzzles	Common shapes (circle, square, triangle, octagon, rectangle, and heart) are inset in squares to form a larger square. The configuration of this puzzle can be changed to work on different shapes.
Equals and Opposites	This resource can help your child learn equal and opposites using 30 self-correcting puzzle pairs. It is designed to develop fine motor and problem solving skills.
Feelings and Prepositions Inset Puzzles	These twelve piece puzzles are designed for ages two-five-years-old. The feelings puzzle depicts nine labeled emotions and corresponding facial expressions. The puzzle with prepositions shows: in, out, down, up, above, below, on, and off.
Five Little Monkeys	You won't recognize these monkeys. They visit the beach, get into glue, and steal currant buns. Your child may enjoy the monkeys in new situations.
Identical Matching Block Sets	When requesting a child match or "Do what I do," when building or using relationship development intervention, these sets of identical blocks are just the ticket.
Lap Animal, Weighted	Check out this heavy turtle if your OT suggests proprioceptive input for your child.
Linear Number Puzzle	These puzzle pieces interlock, have dowel holes and pegs so a child can place the right number of pegs and have the numerals painted on them as well.
Magnetic Wooden Pocket Dolls	For those of you who remember paper dolls, here is an update that may be easier for those with fine motor difficulties to play with. The set comes with two female figures and a variety of clothes in which to dress them.
Size Sorting Jig	Teaching the concepts of small, medium and large will be an easier task with this jig. It contains a variety of objects to sort by size: bells, keys, spoons, eggs, coins, spools, etcetera.
Tumblers and Matching Blocks	This set of red, yellow, blue and green tumblers with sets of four blocks of matching colors can be used for color identification or sorting for an independent work task.
Wooden Inset Puzzles	This set of wooden inset puzzles includes an alphabet set, left and right hand with fingers numbered from 1 to 10, a left and right foot with toes numbered from 1 to 10, and the numerals from 0 though 9.
